

# Contaminated Sediment Disposal Process

Norfolk, VA

1) Removed the top, soft, contaminated layer of sediment from the water bottom.

Shown above:

**CABLE ARM, INC** **LEVEL-CUT**  
**OVERLAPPING** **SIDEPLATES**  
**14y<sup>3</sup> - 14' X 14' FOOTPRINT**  
**WORKING AT 50,000 LBS**  
**4600 MANITOWOC CRANE**  
**INSTALLED WITH CLAMVISION**

2) Transported barge to the mixing/unloading site and solidified the material by adding blown lime.

3) Solidified material can now be loaded and transported by truck to the disposal site.
